

National Time's 400 Series Architectural clocks lead the industry in durability and value. Our clocks are supplied completely assembled ready to be installed into rough openings to alleviate job-site costs, aggravation, and hassle. No more mounting and wiring individual lighting ballasts and clock mechanisms and on-site design of reflective back plates.

A tempered glass crystal housed in an aluminum frame protects your choice of dial and hands. Select one of our popular styles or design your own to match your facade. The aluminum hands are driven by the industry's most powerful worm-driven gear train mechanism which can be automatically corrected for power outages and daylight savings adjustments using one of National's Master Clocks.

## Features:

- Tempered Glass Crystal
- Aluminum Construction
- Long-lasting Neon or High Efficiency Fluorescent Lighting
- Durable Worm-Driven Movement
- Custom Dial and Hand Design
- Ready-to-Mount Assembly
- Accurate Maintenance-free timekeeping with Master Clock (sold separately)
- Manufactured in U.S.A.
