

Introduction

National Time & Signal 300 Series Round Cabinet clocks are available with internal illumination. The fully enclosed welded aluminum cabinet serves as a lighting and component enclosure that provides easy means of installation. Select any hand and dial configuration or create your own graphics including logos or other visions. All 300 Series clocks can be provided with a remote reset switch for easy time setting or they can be corrected following power outages and day light savings with an automatic clock controller. Optional GPS and LAN interface to the NIST Atomic clock base are also available. Clock mechanisms are sized to design requirements. Since 1930, National Time clocks are proudly made in the USA
